I Admission Policy

Admission Policy of Graduate School of Medicine and Pharmaceutical Sciences

Based on its purpose and policy on completion certification and degree conferment (diploma policy), the Graduate School of Medicine and Pharmaceutical Sciences welcomes the persons who have strong interest and basic ability in the research field of Pharmaceutical Science, have logical thinking ability and creativity, and have the will to contribute to the development of human and environmental health culture.

Therefore, as a basic policy of our enrollment selection, we offer various kinds of admission examinations which provide multiple admission opportunities to diversified applicants.

Admission Policy of Medical Sciences

- The program seeks persons who are interested in life science, want to acquire the knowledge in the basic and clinical fields of medicine, and aim to play an active role in various fields as highly specialized professionals having the most advanced knowledge.
- The program seeks persons who wish to advance their careers in their workplaces as medical professionals by obtaining the most advanced medical knowledge.

[Basic policy on selection (admission examination types and their evaluation methods)]

General Admission Examination

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination, oral examination, statement of reasons for application, and academic transcript.

Special Admission Examination

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through foreign language (English) examination, oral examination, statement of reasons for application, letter of recommendation, and academic transcript.

Special Admission Examination for Working Adults

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through the achievement review, foreign language (English) examination, oral examination, statement of reasons for application, and academic transcript.

Special Admission Examination for International Students

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination, oral examination, statement of reasons for application, and academic transcript.

Admission Policy of Nursing Sciences

The program seeks students who have a wide range of deep academic knowledge in nursing practice and its interdisciplinary fields, understand the purpose of developing research execution ability or the ability required for highly specialized professionals, and have the following qualities.

(1) Wishing to play an active role in the fields where highly skilled abilities are required (such as abilities to cope with advanced medical treatment, understand patients based on psychology and bioethics, improve QOL and self-recovery of patients, and solve health, medical, and welfare related issues).

(2) Seeking a career development to become excellent nurses who can comprehensively and systematically grasp the healthcare and welfare related issues based on the current situation of nursing and future prospects, and can respond to those issues.

[Basic policy on selection (admission examination types and their evaluation methods)]

General Admission Examination

For admission selection, the applicant's basic knowledge and research execution ability required to acquire advanced nursing practice ability and research method are evaluated through a

short essay and aptitude test, foreign language (English) examination, and oral examination.

Special Admission Examination for Working Adults

For admission selection, the applicant's achievements of nursing practice and research activities, interest in research and ability to carry it out, which are required to acquire advanced nursing practice ability and research method, are evaluated through achievement review, foreign language (English) examination, and oral examination.

Admission Policy of Pharmaceutical Sciences

This program is aimed at nurturing people who can contribute to the progress of people's health and academic research as researchers, educators, engineers in the fields of pharmaceutical science, as well as specialists who will be responsible for the development and dissemination of pharmaceutical science in the future. To that end, students need to not only learn a wide range of academic knowledge and advanced expertise in pharmaceutical science, but also acquire the ability to integrate and apply them to carry out highly creative researches under a high ethical sense based on the spirit of respect for human beings. For that purpose, this program seeks the following students.

- Those who aim to be excellent researchers, educators, and engineers active in pharmaceutical science and interdisciplinary fields
- Those with expertise in pharmaceutical science and life science
- Those who wish to contribute to the good health of people and the advancement of academic research by solving various issues related to pharmaceutical science through researches
- Those who have sufficient communication and presentation abilities to explain and discuss the content and value of their research projects with researchers in Japan and abroad.

[Basic policy on selection (admission examination types and their evaluation methods)]

General Admission Examination

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination, oral examination and academic transcript.

Special Admission Examination for International Students

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination, oral examination and academic transcript.

II General Admission Examination

1. Summary of Admissions Selection Schedule

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Program	Application period	Examination date	Date of announcement of successful applicants	Admission procedures (deadline date)
Medical Sciences	Friday, July 7 to Thursday, July 13, 2023	Tuesday, August 22, 2023	Friday, September 8, 2023	(Enrollment in October 2023)
Nursing Sciences				Friday, September 15, 2023
Pharmaceutical Sciences				(Enrollment in April 2024) Wednesday, March 6, 2024 (provisional)

Enrollment in April 2024 (The second recruitment)

Program	Application period	Examination date	Date of announcement of successful applicants	Admission procedures (deadline date)
Medical Sciences	Monday, December 18 to Friday, December 22, 2023	Wednesday, January 31, 2024	Tuesday, February 13, 2024	Wednesday, March 6, 2024 (provisional)
Nursing Sciences				
Pharmaceutical Sciences				

(Note) If the first recruitment reaches the maximum number of applicants, the second recruitment may not be conducted. The availability of the second recruitment will be announced on our website around November 2023.

2. Number of Students to be Admitted

Program name	Enrollment in April 2024 Number of students to be admitted	Enrollment in October 2023 Number of students to be admitted	Remarks
Medical Sciences	6	A few	The number of applicants includes the admission quota (a few) for Special Admission Examination for Working Adults and Special Admission Examination for International Students.
Nursing Sciences	8	A few	The Nursing Sciences program includes the Researcher course, Certified Nurse Specialist (CNS) course (cancer/maternal), and Nurse Practitioner (NP) course*. The number of applicants includes the admission quota (a few) for Special Admission Examination for Working Adults.
Pharmaceutical Sciences	44	A few	The number of applicants includes the admission quota (a few) for Special Admission Examination for International Students.
Total	58	—	The number of students to be admitted for each program is an approximate number.

* Nurse Practitioner (NP) Course is accepted only for April enrollment.

(Note) Applicants for admission should consult with their academic advisors in the field of their choice in advance regarding the direction of education, research, etc. You cannot apply if you have not decided who you want to be your academic advisor.

3. Eligibility for Application

Applicants must fulfill any of the following requirements: In addition to these requirements, applicants who apply for Nurse Practitioner (NP) course in the Nursing Science program must have at least 5 years of nursing experience and a nursing license certified in Japan.

- (1) A person who graduated (or is expected to graduate prior to admission to the graduate school) from a Japanese university.
 - (2) A person who was granted (or is expected to be granted a bachelor's degree prior to admission to the graduate school) by the National Institution for Academic Degrees and Quality Enhancement of Higher Education under the provisions of Article 104, paragraph 7 of the School Education Act.
 - (3) A person who has completed or is expected to complete prior to admission to the graduate school a 16-year school education course in a foreign country.
 - (4) A person who has completed (or is expected to complete prior to admission to the graduate school) a 16-year education course of a foreign school which provides a distance education program, by finishing the subjects of the distance education program of the foreign school in Japan.
 - (5) A person (limited to a person who completed a 16-year school education course of a foreign country) who has completed (or is expected to complete prior to admission to the graduate school) the course designated by the Minister of Education, Culture, Sports, Science and Technology in Japan (herein after referred to as MEXT) operated by an educational institution positioned as having a course of a foreign university under the school education system of the foreign country.
 - (6) A person who was granted a degree equivalent to a bachelor's degree by completing a course, studying for three or more years at a foreign university or another foreign school (limited to schools that have been evaluated with regard to the overall status of their educational and research activities, etc. by a party certified by the government or a governmental organization of the foreign country, or schools designated as being equivalent thereto by the Minister of MEXT), or is expected to be granted it prior to admission to the graduate school.
In the above "completing a course" includes: the completion of the course by taking classes in Japan through distance education operated by a foreign school; or the completion of the course operated by an educational institution positioned under the school education system of the foreign country as well as designated in the preceding paragraph.
 - (7) A person who has completed (or is expected to complete prior to admission to the graduate school) a specialized course operated by an advanced vocational school (limited to courses that take four or more years to complete and satisfy other criteria specified by the Minister of MEXT) and designated by the Minister of MEXT on or after the day specified by the Minister of MEXT.
 - (8) A person designated by the Minister of MEXT (Public notice No. 5 of the Ministry of Education, 1953).
 - (9) A person who was admitted to another graduate school according to the provisions of Article 102, paragraph (2) of the School Education Act, and is admitted to our graduate school on the condition that the person is recognized by us as having academic ability suitable for receiving postgraduate education.
 - (10) A person who has been recognized as having academic ability equivalent to or higher than that of university graduates through an individual examination of eligibility for application for this program, and will have turned 22 years old at the time of admission.
 - (11) A person who has been enrolled in a university for 3 or more years as of the end of month prior to admission to the graduate school, and has been recognized by us as having acquired the designated credits with an excellent academic record.
- (Note) A person who intends to file an application in accordance with the Eligibility of Application (9) to (11) is required to undergo an individual Examination of Eligibility for Application in advance. See "3. Examination of Eligibility for Application" on page 25, and follow the prescribed procedure.

4. Use of External English Test

For the General Admission Examination, no written foreign language (English) test is conducted, and the applicant's proficiency is judged based on the score of the submitted external English test, which will be converted on a 100-point scale basis.

For the Nursing Sciences program, an applicant who cannot submit the score of the external English tests, a written language (English) examination is conducted.

If you have taken two or more English tests, use one with a higher converted score.

Only the scores of the tests taken on and after September 1, 2021* are valid and acceptable.

* The Nursing Science program has no restriction on the examination date.

Score conversion method

- TOEFL-iBT

70 or more = 100 points

If less than 70

Converted point = $100 \times (\text{TOEFL-iBT score})/70$

- TOEFL-ITP

525 or more = 100 points

If less than 525

Converted point = $100 \times \{(\text{TOEFL-ITP score}) - 310\}/215$

310 or less = 0 point

- TOEIC L&R, TOEIC L&R-IP

730 or more = 100 points

If less than 730

Converted point = $100 \times (\text{TOEIC score})/730$

5. Selection Method of Medical Sciences

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination (refer to "4. Use of external English test" on page 9), oral examination, statement of reasons for application and academic transcript.

(1) Written examination

Short essay and aptitude test

- The applicants will be asked about their motivation, research plan, interests in Medical Sciences, and ethics.

(2) Oral examination

- Based on the answers from the written examination, the applicants will be asked in an interview about their reasons for application, their plans on how they will use what they have learned so far for the development of their postgraduate study, future research plans, hopes and their plans for social contributions after completion of the course, etc.

(3) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 11:00 to 12:00	Short essay and aptitude test	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination*	

Enrollment in April 2024 (The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 11:00 to 12:00	Short essay and aptitude test	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination*	

* The starting time of the oral examination may vary depending on the number of applicants. We will inform you of any changes, if any, when we issue you the examination admission card.

6. Selection Method of Nursing Sciences

For admission selection, the applicant's basic knowledge and research execution ability required to acquire advanced nursing practice ability and research method are evaluated through a short essay and aptitude test, foreign language (English) examination (refer to "4. Use of external English test" on page 9), and oral examination.

(1) Written examination

Foreign language test: English (An English-Japanese dictionary is allowed to be used during the test. However, the use of electronic dictionaries and nursing and medical dictionaries is not permitted.)

*1 If you use an external English test, you will not be required to take a written foreign language (English) examination. (Note)

Short essay and aptitude test

- The aptitude test requires basic knowledge of your desired field.

(2) Oral examination

- Questions such as motivation for applying to the graduate school and enthusiasm for research are asked.

(3) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 9:30 to 10:30	Foreign language (English) *1	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 11:00 to 12:00	Short essay and aptitude test	
	From 13:30	Oral examination *2	

Enrollment in April 2024

(The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 9:30 to 10:30	Foreign language (English) *1	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 11:00 to 12:00	Short essay and aptitude test	
	From 13:30	Oral examination *2	

*2 The starting time of the oral examination may vary depending on the number of applicants. We will inform you of any changes, if any, when we issue you the examination admission card.

(Note) Written examinations in foreign languages (English) will not be conducted for admission examinations for the Nursing Sciences program after April 2024. Instead, you will need to take the external English test in advance.

7. Selection Method of Pharmaceutical Sciences

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination (refer to "4. Use of external English test" on page 9), oral examination and academic transcript.

(1) Written examination

Short essay and aptitude test

- The aptitude test requires basic knowledge of your desired field.

(2) Oral examination

- Questions such as motivation for applying to the graduate school and enthusiasm for research are asked.

(3) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 11:00 to 12:00	Short essay and aptitude test	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination*	

Enrollment in April 2024 (The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 11:00 to 12:00	Short essay and aptitude test	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination*	

* The starting time of the oral examination may vary depending on the number of applicants. We will inform you of any changes, if any, when we issue you the examination admission card.

III Special Admission Examination for Working Adults

1. Summary of Admissions Selection Schedule

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Program	Application period	Examination date	Date of announcement of successful applicants	Admission procedures (deadline date)
Medical Sciences	Friday, July 7 to Thursday, July 13, 2023	Tuesday, August 22, 2023	Friday, September 8, 2023	(Enrollment in October 2023) Friday, September 15, 2023
Nursing Sciences				(Enrollment in April 2024) Wednesday, March 6, 2024 (provisional)

Enrollment in April 2024 (The second recruitment)

Program	Application period	Examination date	Date of announcement of successful applicants	Admission procedures (deadline date)
Medical Sciences	Monday, December 18 to Friday, December 22, 2023	Wednesday, January 31, 2024	Tuesday, February 13, 2024	Wednesday, March 6, 2024 (provisional)
Nursing Sciences				

(Note) If the first recruitment reaches the maximum number of applicants, the second recruitment may not be conducted. The availability of the second recruitment will be announced on our website around November 2023.

* Applicants for the Pharmaceutical Sciences program who are in employment should take the General Admission Examination.

2. Number of Students to be Admitted

Program name	Number of students to be admitted	Remarks
Medical Sciences	A few	This admission quota is included in that for general admission examination.
Nursing Sciences	A few	The Nursing Sciences program includes the Researcher course, Certified Nurse Specialist (CNS) course (cancer/maternal), and Nurse Practitioner (NP) course*. This admission quota is included in that for general admission examination.

* Nurse Practitioner (NP) Course is accepted only for April enrollment.

(Note) Applicants for admission should consult with their academic advisors in the field of their choice in advance regarding the direction of education, research, etc. You cannot apply if you have not decided any academic advisor.

3. Eligibility for Application

A person who satisfies any of the following requirements and has at least 3 years of work experience and experience of research presentations is eligible for application. In addition to these requirements, applicants who apply for Nurse Practitioner (NP) course in the Nursing Science program must have at least 5 years of nursing experience and a nursing license certified in Japan.

- (1) A person who graduated from a university.
- (2) A person who was granted a bachelor's degree by the National Institution for Academic Degrees and Quality Enhancement of Higher Education under the provisions of Article 104, paragraph 7 of the School Education Act.
- (3) A person who has completed a 16-year education course by school education in a foreign country.
- (4) A person who has completed a 16-year education course of a foreign school which provides a distance education program by finishing the subjects of the distance education program of the foreign school in Japan.
- (5) A person (limited to a person who completed a 16-year school education course of a foreign country) who has completed the course designated by the Minister of Education, Culture, Sports, Science and Technology in Japan (herein after referred to as MEXT) operated by an educational institution positioned as having a course of a foreign university under the school education system of the foreign country.
- (6) A person who was granted a degree equivalent to a bachelor's degree by completing a course, studying for three or more years at a foreign university or another foreign school (limited to

schools that have been officially authorized by the government or a governmental organization of the foreign country with regard to the overall status of their educational and research activities, etc., or schools designated as being equivalent thereto by the Minister of MEXT). In the above “completing a course” includes: the completion of the course by taking classes in Japan through distance education operated by the relevant foreign school; or the completion of the course operated by an educational institution positioned under the school education system of the foreign country as well as designated in the preceding paragraph.

- (7) A person who has completed a specialized course operated by an advanced vocational school (limited to courses that take four or more years to complete and satisfy other criteria specified by the Minister of MEXT) and separately designated by the Minister of MEXT on or after the day specified by the Minister of MEXT.
 - (8) A person designated by the Minister of MEXT (Public notice No. 5 of the Ministry of Education, 1953).
 - (9) A person who was admitted to another graduate school according to the provisions of Article 102, paragraph (2) of the School Education Act, and is admitted to our graduate school on the condition that the person is recognized by us as having academic ability suitable for receiving postgraduate education.
 - (10) A person who has been recognized as having academic ability equivalent to or higher than that of university graduates through an individual examination of eligibility for application for this program, and will have turned 22 years old at the time of admission.
- (Note) A person who intends to file an application in accordance with the Eligibility of Application (9) and (10) is required to undergo an individual Examination of Eligibility for Application in advance. See “3. Examination of Eligibility for Application” on page 25, and follow the prescribed procedure.

4. Use of External English Test

For the Medical Sciences program, no written foreign language (English) test is conducted, and the applicant’s proficiency is judged by the score of the submitted external English test, which is converted on a 100-point scale basis.

For the Nursing Sciences program, an applicant who has submitted a score of the external English test will not take a written foreign language (English) examination, and the applicant’s proficiency is judged based on the score of the submitted external English test, which is converted on a 100-point scale basis. For a person, who cannot submit the score of the external English tests, a written language (English) examination is conducted.

If you have taken two or more English tests, use one with a higher converted score.

Only the scores of the tests taken on and after September 1, 2021* are valid and acceptable.

* Only the Nursing Science program has no restriction on the examination date.

Score conversion method

- TOEFL-iBT

70 or more = 100 points

If less than 70

Converted point = $100 \times (\text{TOEFL-iBT score}) / 70$

- TOEFL-ITP

525 or more = 100 points

If less than 525

Converted point = $100 \times \{(\text{TOEFL-ITP score}) - 310\} / 215$

310 or less = 0 point

- TOEIC L&R, TOEIC L&R-IP

730 or more = 100 points

If less than 730

Converted point = $100 \times (\text{TOEIC score}) / 730$

5. Selection Method of Medical Sciences

For admission selection, the applicant’s motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a performance examination, foreign language (English) examination (refer to “4. Use of external English test” on page 13), oral examination, statement of reasons for application and academic transcript.

(1) Oral examination

- Applicants will be asked in an interview about the reasons for application, their interests in research on Medical Science, their plans on how they will use what they have learned so far for the development of their postgraduate study, future research plans, ethics, hopes and their plans for social contributions after completion of the course, etc.

(2) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 13:30	Oral examination*	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture

Enrollment in April 2024 (The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 13:30	Oral examination*	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture

* The starting time of the oral examination may vary depending on the number of applicants.
We will inform you of any changes, if any, when we issue you the examination admission card.

6. Selection Method of Nursing Sciences

For admission selection, the applicant's achievements of nursing practice and research activities, interest in research and ability to carry it out, which are required to acquire advanced nursing practice ability and research method, are evaluated through a performance examination, foreign language (English) examination (refer to "4. Use of external English test" on page 13), and oral examination.

(1) Written examination

Foreign language test: English (An English-Japanese dictionary is allowed to be used during the test. However, the use of electronic dictionaries and nursing and medical dictionaries is not permitted.)

*1 If you use an external English test, you will not be required to take a written foreign language (English) examination. (Note)

(2) Oral examination

- Questions such as motivation for applying to the graduate school and enthusiasm for research are asked.

(3) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 9:30 to 10:30	Foreign language (English) *1	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination *2	

Enrollment in April 2024 (The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 9:30 to 10:30	Foreign language (English) *1	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination *2	

*2 The starting time of the oral examination may vary depending on the number of applicants.
We will inform you of any changes, if any, when we issue you the examination admission card.

(Note) Written examinations in foreign languages (English) will not be conducted for admission examinations for the Nursing Sciences program after April 2024. Instead, you will need to take the external English test in advance.

IV Special Admission Examination for International Students

1. Summary of Admissions Selection Schedule

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Program	Application period	Examination date	Date of announcement of successful applicants	Admission procedures (deadline date)
Medical Sciences	Friday, July 7 to Thursday, July 13, 2023	Tuesday, August 22, 2023	Friday, September 8, 2023	(Enrollment in October 2023)
Pharmaceutical Sciences				Friday, September 15, 2023 (Enrollment in April 2024) Wednesday, March 6, 2024 (provisional)

Enrollment in April 2024 (The second recruitment)

Program	Application period	Examination date	Date of announcement of successful applicants	Admission procedures (deadline date)
Medical Sciences	Monday, December 18 to Friday, December 22, 2023	Wednesday, January 31, 2024	Tuesday, February 13, 2024	Wednesday, March 6, 2024 (provisional)
Pharmaceutical Sciences				

(Note) If the first recruitment reaches the maximum number of applicants, the second recruitment may not be conducted. The availability of the second recruitment will be announced on our website around November 2023.

2. Number of Students to be Admitted

Program name	Number of students to be admitted	Remarks
Medical Sciences	A few	This admission quota is included in that for general admission examination.
Pharmaceutical Sciences	A few	This admission quota is included in that for general admission examination.

(Note) Applicants for admission should consult with their academic advisors in the field of their choice in advance regarding the direction of education, research, etc. You cannot apply if you have not decided any academic advisor.

3. Eligibility for Application

Those who have foreign nationality and satisfy any of the following requirements are eligible to apply.

- (1) A person who has completed or is expected to complete prior to admission to the graduate school a 16-year school education course in a foreign country.
- (2) A person who was granted a degree equivalent to a bachelor's degree by completing a course, studying for three or more years at a foreign university or another foreign school (limited to schools that have been evaluated with regard to the overall status of their educational and research activities, etc. by a party certified by the government or a governmental organization of the foreign country, or schools designated as being equivalent thereto by the Minister of MEXT), or is expected to be granted it prior to admission to the graduate school.
In the above "completing a course" includes the completion of the course by taking classes in Japan through distance education operated by a foreign school, or completion of the course operated by an educational institution positioned under the school education system of the foreign country as well as designated in the preceding paragraph.
- (3) A person who has been recognized as having academic ability equivalent to or higher than that of university graduates through an individual examination of eligibility for application for this program, and will have turned 22 years old at the time of admission.
- (4) A person who was admitted to another graduate school according to the provisions of Article 102, paragraph (2) of the School Education Act, and is admitted to our graduate school on the condition that the person is recognized by us as having academic ability suitable for receiving postgraduate education.

(Note) A person who intends to file an application in accordance with the Eligibility of Application (3) and (4) is required to undergo an individual Examination of Eligibility for Application in advance. See “3. Examination of Eligibility for Application” on page 25, and follow the prescribed procedure.

4. Use of External English Test

For the Medical Sciences program, no written foreign language (English) test is conducted, and the applicant’s proficiency is judged by the score of the submitted external English test, which is converted on a 100-point scale basis.

For the Pharmaceutical Sciences program, an applicant who has submitted a score of the external English test will not take a written foreign language (English) examination, and the applicant’s proficiency is judged based on the score of the submitted external English test, which is converted on a 100-point scale basis. Applicants who cannot submit the score of the external English tests will take a written language (English) examination.

If you have taken two or more English tests, use one with a higher converted score.

Only the scores of the tests taken on and after September 1, 2021 are valid and acceptable.

Score conversion method

- TOEFL-iBT

70 or more = 100 points

If less than 70

Converted point = $100 \times (\text{TOEFL-iBT score})/70$

- TOEFL-ITP

525 or more = 100 points

If less than 525

Converted point = $100 \times \{(\text{TOEFL-ITP score}) - 310\}/215$

310 or less = 0 point

- TOEIC L&R, TOEIC L&R-IP

730 or more = 100 points

If less than 730

Converted point = $100 \times (\text{TOEIC score})/730$

5. Selection Method of Medical Sciences

For admission selection, the applicant’s motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination (refer to “4. Use of external English test” on page 16), oral examination, statement of reasons for application and academic transcript.

(1) Written examination

Short essay and aptitude test

- The applicants will be asked about their motivation, research plan, interests in Medical Sciences, and ethics.

(2) Oral examination

- Based on the answers from the written examination, the applicants will be asked in an interview about their reasons for application, their plans on how they will use what they have learned so far for the development of their postgraduate study, future research plans, hopes and their plans for social contributions after completion of the course, etc.

(3) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 11:00 to 12:00	Short essay and aptitude test	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination *	

Enrollment in April 2024 (The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 11:00 to 12:00	Short essay and aptitude test	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 13:30	Oral examination *	

- * The starting time of the oral examination may vary depending on the number of applicants. We will inform you of any changes, if any, when we issue you the examination admission card

6. Selection Method of Pharmaceutical Sciences

For admission selection, the applicant's motivation, enthusiasm and academic ability equivalent to or higher than that of Japanese university graduates (graduating from a 4-year undergraduate school) are evaluated through a short essay and aptitude test, foreign language (English) examination (refer to "4. Use of external English test" on page 16), oral examination and academic transcript.

(1) Written examination

Short essay and aptitude test

- The aptitude test requires basic knowledge of your desired field.

Foreign language (English) examination

- *1 If you use an external English test, you will not be required to take a written foreign language (English) examination.

(2) Oral examination

- Questions such as motivation for applying to the graduate school and enthusiasm for research are asked.

(3) Examination Date and Venue

Enrollment in April 2024 (The first recruitment) and Enrollment in October 2023

Examination date	Time	Examination subjects, etc.	Examination venue
Tuesday, August 22, 2023	From 9:30 to 10:30	Foreign language (English) *1	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 11:00 to 12:00	Short essay and aptitude test	
	From 13:30	Oral examination *2	

Enrollment in April 2024 (The second recruitment)

Examination date	Time	Examination subjects, etc.	Examination venue
Wednesday, January 31, 2024	From 9:30 to 10:30	Foreign language (English) *1	Sugitani Campus (Medicine and Pharmaceutical), University of Toyama 2630 Sugitani, Toyama-city, Toyama Prefecture
	From 11:00 to 12:00	Short essay and aptitude test	
	From 13:30	Oral examination *2	

- *2 The starting time of the oral examination may vary depending on the number of applicants. We will inform you of any changes, if any, when we issue you the examination admission card.

V General Procedure of Application and Admission

1. Application Procedures

Applications must be submitted online only. The application procedure is completed by sending the required documents by registered express mail within the application period after the registration and payment of the application fee on the Internet application site. Please read the following "Online Application Procedure" carefully and follow the instructions.

Online Application Procedure

Prepare see page 22

Prepare a PC with an Internet connection and a printer, etc. It may take time for the required documents* to be issued. Please start preparing them early and ensure that you have them with you before applying.

*Required Documents : An official transcript, data of your photo, etc.

Access the Online Application Website

Access from the Online Application website
or
the University website

<https://e-apply.jp/ds/toyama-gs/>

<https://www.u-toyama.ac.jp/>

After completing registration on the Internet application site (STEP 2), the application is completed by paying the examination fee (STEP 3), printing and mailing the required documents (STEP 4, STEP 5). Please note that your application is not complete just by registering. Online applications are available 24 hours a day. However, application documents must arrive by 17:00 on the last day of the application period. Please make sure to give yourself plenty of time when applying.

STEP

1

Create an Account on My Page

Enter the required information according to the instructions on the screen to create an account on My Page. If you have already registered on My Page, proceed to STEP 4.

① If you are registering for the first time, click

My Page Registration

② Register your e-mail address and click on

Send an e-mail for temporary registration

③ Click on the **To the log-in page** from the user registration screen.

④ A default password and a registration URL will be sent to your registered e-mail address.

*Configure your e-mail settings to receive e-mails from the @e-apply.jp domain.

⑤ From the log-in screen, use your registered e-mail address and the default password you received in step 4 and click

log-in

⑥ Change your default password.

⑦ Enter your personal information and click

Next

⑧ Confirm your personal information and click

Register this information

⑨ Registration is complete. Click **To My Page**

⑩ When the above page appears, My Page registration is complete. Click on the **Log-out** button.

*You can proceed to the application procedures by clicking on the **Apply** button only while applications are being accepted. You cannot proceed from here onward during times outside the period.

STEP

2

Register the Contents of Your Application

Make sure to check the procedures and important notices on the screen, and then enter the required fields according to the instructions on the screen.

① After logging in to My Page, click on the **Apply** button, and the registration page will appear.

② Select an entrance exam and confirm the important notices.

③ Select the desired department, etc.

④ Upload a photo. Click on the **Select Photo** button to select a photo.

⑤ Enter your information entrance (name, address, etc.).

⑥ Confirm the contents of your application. Click on the **Application Form (sample)** button to check your application form.

⑦ Your application is registered. Click on the **Pay** button to proceed to the page where you can pay your entrance examination fee.

⑧ Payment methods for examination fees.

- Convenience stores
- ATMs with Pay-easy
- Online banking
- Credit cards

⑨ Document required for the application in PDF format (Sample)

*This document can be printed out after the entrance examination fee is paid.

If you have selected "Convenience Stores" or "ATMS with Pay-easy" as your payment method, write down the payment number, which will appear after the selection of a payment method, in the memo space below, and make the payment at a convenience store or an ATM with Pay-easy within the designated payment deadline.

For 7-ELEVEN

Payment slip number Memo (13 digits)

For LAWSON, MINISTOP, FamilyMart, ATMS with Pay-easy

Customer number memo (11 digits)

Confirmation number memo (6 digits)

For Daily YAMAZAKI, Seicomart

Online payment number by Memo (11 digits)

Receiving agency number (5 digits) **5 8 0 2 1**

*A receiving agency number is required for payment Pay-easy.

A confirmation e-mail will be sent to you after the application registration is completed. If you have restricted the reception of e-mails, please allow e-mails from the sender (@e-apply.jp) to be received. *Please note that confirmation e-mails may be sorted into your junk e-mail folder, etc.

Please be careful not to enter incorrect information, as the registered information cannot be changed or modified after the application registration is completed. However, if you have not yet paid the entrance examination fee, you can substantially modify the information by re-registering using the correct information.

*Please note that if you have selected a credit card for the "Payment Method for the Entrance Examination Fee," the payment will be completed simultaneously with the registration for application.

STEP

3

Pay the Entrance Examination Fee

1 Credit Card Payment

You can select this method and make a payment when registering your application.

[Accepted Credit Cards]

VISA, Master, JCB, AMERICAN EXPRESS, MUFG Card, DC Card, UFJ Card, NICOS Card

2 Online Banking Payment

After registering your application, you will be redirected to the page of each financial institution from the current page. Please follow the instructions on the screen to make the payment.

*For online payment, your bank account must be signed up for internet banking.

The procedures are completed online.

3 Convenience Store Payment

Payment at a convenience store can be made using the payment number that will appear after you have registered the application information.

● Payment can be made at a cash register.

● Payment can be made using a store terminal.

Loppi

Multi-functional copy machine

あなたも、コンビニ。 FamilyMart

4 Bank ATMs with Pay-easy

Payment can be made using the payment number that will appear after you have registered the application information at bank ATMs with Pay-easy by following the instructions on the ATM screen.

*Please check the "Payment Method Selection" screen to see the banks that offer this payment method.

Enter the required information following the instructions on the screen of each convenience store terminal or ATM and confirm the details before paying the entrance examination fee.

3 Convenience Stores

STEP

4

Printing required documents

Please log in from the "Confirm Application/Print Application Form" button and print the application form and other required documents in color on A4 paper.

Application form PDF (image)

STEP

5

Mailing application documents

Please note that your application is not complete just by registering.

Please send the documents required for the application by "Registered express mail" from the post office window during the application period.

■ Application Documents

One copy is required for each application registration.

Please refer to pages 23 to 25 of the university's application guidelines to prepare the documents required for application.

<Deadline for submission of application documents>

See page 23

Address sheet

Post office window

The mailing address for the application documents is automatically printed on the address sheet.

Paste the address sheet on a commercially available square No. 2 envelope (240mm x 332mm) please.

Once received, the application fee and application documents will not be returned except for reasons specified in the application guidelines.

< Application completed >

We will not respond to any inquiries regarding acceptance by telephone or other means.

STEP

6

Print your admission ticket see page 25

You will be able to print your admission ticket from the online application site after the date of issuance of your admission ticket. Please log in from the "Print Examination Ticket" button and print it. Be sure to print the admission ticket in color on A4 paper and bring it with you on the day of the examination.

(1) Advance preparation

Documents, etc.	summary
Recommended System Environmentst	<p>Use the following Web browser for Internet filing:</p> <ul style="list-style-type: none">• Microsoft Edge Latest edition• Google Chrome Latest edition• Mozilla Firefox Latest edition• Apple Safari 8 or later <p>* If you would use a tab function of a browser to simultaneously carry out an application operation using more than one tab, there may be the case of malfunction, such as, selected contents are taken over to other tabs. Please refrain from simultaneously carrying out the application operation using more than one tab. If you want to go back to the previous screen, please use the "Return" button displayed on the screen instead of the "Back" button of your browser.</p> <p>* Mobile devices such as smartphones and tablets can be viewed, but since it is not a recommended environment, it may not be displayed properly from some terminal screens. In addition, a printing function is required, so please use a computer.</p>
Software needed for downloading or printing PDF files	Adobe Reader is necessary to view or print the application form that is in a PDF format. Please download the Adobe Reader software from the following website (free download).
E-mail address	<p>A valid email address is required for your application. Please be ready to provide your email address when you start your online registration for application.</p> <p>We recommend that you use an email address that can be used with a computer in order to print out the application form.</p> <p>Also, please check your email settings to ensure that you receive emails from the following domain: @e-apply.jp</p>
Personal photo	<p>Face photo data by the applicant in the application (jpeg, png, bitmap, or gif) is required.</p> <p>In the upper body, no hat, front-facing, Please prepare a clear photograph taken within 3 months prior to submission. File will be up to 10MB.</p> <p>It should be noted that, if it is determined that it is not suitable as application photos, there is a case to be re-submitted..</p>
Printer	In order to output the application form and examination admission ticket (PDF), print on A4 plain paper. You need a color printer that can be used with printing paper (plain paper, PPC paper, OA common paper, copy paper, etc.) Please to mind.
Square 2 envelope	Use a commercially available No. 2 square envelope (240 mm x 332 mm). Please use the "address sheet" that is output when you print the admission application form and paste it on the envelope.

(2) Application Period

	Category	Application Period
Enrollment in October 2023	General Admission Examination, Special Admission Examination for Working Adults, and Admission Examination for International Students	Friday, July 7 to Thursday, July 13, 2023 at 17:00
Enrollment in April 2024 (The first recruitment)	General Admission Examination, Special Admission Examination for Working Adults, and Admission Examination for International Students	
Enrollment in April 2024 (The second recruitment)	General Admission Examination, Special Admission Examination for Working Adults, and Admission Examination for International Students	Monday, December 18 to Friday, December 22, 2023 at 17:00

If you hand in the documents in person to the University, they are accepted between 9:00 and 17:00 on weekdays.

If you mail them, they must reach the University by 17:00 on Application deadline. However, we will accept application documents even when they reach the University after the expiration of the application period on condition that they are delivered by registered express mail with a postmark before the day before the application deadline.

(3) Examination fee 30,000 yen.

Payment of the application fee will be made after completion of the registration of application details in STEP 2 on page 19. Please apply through the university's "Internet Application Site (<https://e-apply.jp/ds/toyama-gs/>)" and pay the application fee after completing the applicant registration. Please confirm the method of payment of the examination fee by referring to STEP 3, Payment of the Examination Fee, on page 20. After paying the application fee, you will be able to print out the application form.

A separate handling fee is required for payment of the examination fee. The fee is to be paid by the payer.

In addition, there is a system of exemption from the examination fee for those affected by disasters. For more information, please refer to the University's website.

Once the examination fee has been received, it will not be refunded for any reason, except in the following cases.

[1] Cases in which a refund of the examination fee may be requested and the amount of refund.

(i) If you paid the application fee but did not apply to the University of Toyama (did not submit the application documents, etc. or your application was not accepted) [Refund amount] 30,000 yen

(ii) In case of double payment of the examination fee [Refund amount] 30,000 yen

(iii) If you have paid a large amount of the examination fee [Refund amount] The amount you have paid in excess of the examination fee

However, the recipient is responsible for the bank transfer fee when returning the loan.

[2] Method of claiming refund

Please fill out the attached "written claim for refund of examination fee" and mail it to the University.

Send to: Accounting Division I of Finance and Facilities Department,
University of Toyama 3190 Gofuku, Toyama City, Toyama 930-8555
Tel: 076-445-6053

(4) Application Documents

Applicants must submit the required documents in an envelope with an "address sheet" attached. If mailed, please use by registered express mail. The required documents will be sent

after the payment of the examination fee in STEP 3 on page 20 is completed.

Documents to be printed from the Internet application site

Documents, etc.		Notes
[1]	Application for admission	Please print out the application form in A4 size in color from the Internet application site. Printing is available after payment of the application fee.
[2]	Address sheet	Please print out the application form in A4 size in color from the Internet application site. Attach it to a commercially available kakugata 2 envelope (240mm x 332mm) without peeling off.

(2) For documents written in languages other than Japanese or English, attach Japanese or English translations to them.

2. Print out the Examination Voucher and Examination Instructions

- (1) The examination voucher will be available for printing on the Internet application site after the date of issuance of the voucher after the University receives the application documents sent by the applicant. When the examination voucher is ready to be printed, we will notify the applicant's e-mail address registered at the time of Internet application.

Date of Issue of Examination Voucher, etc.

Category	Deadline
Enrollment in October 2023	15:00 on Friday, August 4, 2023 (tentative)
Enrollment in April 2024 (The first recruitment)	
Enrollment in April 2024 (The second recruitment)	15:00 on Friday, January 12, 2024 (tentative)

(Note) The date of issuance of examination vouchers is tentative and may be subject to change.

- (2) Log in to My Page from "Login" on the Internet application site. In order to log in, you will need [your email address and the password you set yourself].
- (3) After log in, please download the examination voucher. Please print out the examination voucher in color on A4 paper and bring it with you on the day of the examination. Please be sure to read the "Precautions for the Examination" printed with the examination voucher. Please be sure to read them carefully before taking the examination.

Precautions

- (1) After printing the examination voucher, be sure to check the information on it. If the information is different from what you registered for the application, please contact the Examination Section of the Admissions Office for Educational Affairs Division of Sugitani Area Administration Department as soon as possible.
Also, be sure to check that the examination number on the computer screen and the number on the printed examination voucher match.
- (2) Even if you do not receive an e-mail, please log in to the Internet application site and print out the examination voucher and instructions for the examination.
- (3) The number you receive when you register your application online is not your examination number. Please be sure to bring your examination voucher with you on the day of the examination, as you will not be allowed to take the examination using your reception number.
- (4) On the day of the examination, it is not acceptable to present the examination voucher by displaying it on the screen of a smartphone or other such device. Be sure to bring the printed examination voucher and keep it in a safe place after the examination.

3. Examination of Eligibility for Application

Each of applicants who intend to file their applications for the General Admission Examination (9) through (11), Special Admission Examination for Working Adults (9) and (10), and the Special Admission Examination for International Students (3) and (4) will be individually examined in

advance. In such cases, make an inquiry to the following section in advance and submit the requested documents by the due date.

[Inquiry and Submission]

Examination Section of Admissions Office, Educational Affairs Division, Sugitani Area
Administration Department, University of Toyama
2630 Sugitani, Toyama City, Toyama Prefecture, 930-0194, Japan
Phone: 076-434-7658

(1) Documents necessary for Examination of Eligibility for Application

[1] Application for Examination of Eligibility for Application (form designated by the University)

[2] Academic Transcript

Applicants eligible to apply for the General Admission Examination (11) are also requested to submit an education curriculum of the faculty in which the applicants have enrolled.

[3] Certificate of graduation (certificate of expected graduation)

[4] Copy of Certificate of Residence (only applicants who have a foreign nationality and currently live in Japan)

[5] Curriculum Vitae (form designated by the University)

[6] Envelope (Chokei 3: 23.5 cm × 12 cm) for sending documents to the applicants (clearly indicate your name, address, and postal code on the envelope with stamps worth 344 yen attached).

[7] Other necessary documents

* The originals of each certificate must be submitted. Copies will not be accepted.

Documents written in foreign languages must be submitted with Japanese translation.

(2) Deadline for the submission of documents

Category	Deadline
Enrollment in October 2023	16:00 on Thursday, June 22, 2023
Enrollment in April 2024 (The first recruitment)	
Enrollment in April 2024 (The second recruitment)	16:00 on Friday, December 1, 2023

As a rule, application documents shall be submitted by mail and must reach the University by the above-mentioned deadline.

If an applicant hands in the documents himself/herself to the university for some inevitable reason, we will accept them between 9:00 and 16:00 on weekdays. They will not be accepted after the deadline.

(3) Notification of the examination results

We will send the result of the preliminary examination to each applicant by the following date .

Category	Notification
Enrollment in October 2023	By Thursday, July 6, 2023
Enrollment in April 2024 (The first recruitment)	
Enrollment in April 2024 (The second recruitment)	By Friday, December 15, 2023

4. Announcement of Successful Applicants

At the following date, the examinee's numbers of successful applicants will be posted on the website of the University of Toyama, and a Notification of Acceptance will be sent to the applicants by mail.

We will not respond to any inquiries by telephone or other means.

Category	Announcement
Enrollment in October 2023	15:00 on Friday, September 8, 2023
Enrollment in April 2024 (The first recruitment)	
Enrollment in April 2024 (The second recruitment)	15:00 on Tuesday, February 13, 2024

5. Admission Procedure

The admission procedure is as follows. More details will be separately notified to the successful applicants.

(1) Admission procedure period

Admission period	Deadline date
Enrollment in October 2023	Friday, September 15, 2023

- (2) Expenses required for the admission procedure
- a. Enrollment fee: 282,000 yen (provisional)
 (Note) [1] The enrollment fee shown above is still provisional. If it is revised at the time of enrollment, the new enrollment fee will apply.
 [2] The paid enrollment fee will not be refunded.
 - b. Others
 - [1] Persons who find it difficult to pay the enrollment fee may be exempted or deferred from collection after deliberation.
 - [2] Tuition fees must be paid after enrollment. The exact amount of the tuition fee and detailed method of the payment will be announced at the time of the admission procedure.
 <Reference> The tuition fee of academic year 2023: 535,800 yen.
 - [3] There is a scholarship system of Japan Student Services Organization.
 - [4] Other expenses include the fee for the Personal Accident Insurance for Students Pursuing Education and Research.
- (3) Remarks
 Persons who have not completed the admission procedure within the Admission procedure period will be considered to have declined the admission.

6. Policy on Personal Information Protection

Personal information possessed by University of Toyama will be handled based on the Act on the Protection of Personal Information, and University of Toyama Personal Information Protection Policy.

- (1) Personal information (including name, address, etc.) of applicants that comes to the knowledge of the University through the application shall be used for [1] applicant selection procedure (application processing and selection), [2] announcement of successful applicants, [3] admission procedure, [4] survey/study of the selection method, and [5] operations associated with those purposes.
- (2) Personal information of those who completed the admission procedure that comes to the knowledge of the University through the application shall be used for post-admission operations related to [1] academic affairs (registration, study guidance, etc.), [2] student support (health care, application for tuition exemption or scholarship, career support, etc.), [3] tuition collection work, and [4] statistical survey and data analysis.
- (3) We may use only the successful applicants' numbers, names, and addresses for the purpose of contact from the University's relevant bodies, such as Alumni Association, Supporting Group and Cooperative Society.
 (Note) Applicants who do not wish to be contacted by the above bodies are requested to inform the Examination Section of Admissions Office, Educational Affairs Division of Sugitani Area Administration Department to that effect.
- (4) University of Toyama may have contractors do some kind of university operations. When conducting the operations, all or part of the personal information obtained shall be provided to the contractor to the extent necessary to perform the operations; however, University of Toyama supervises the use of information to ensure compliance with confidentiality.

7. Notes on Application

- (1) If any submitted application document is incomplete, the application may not be accepted.
- (2) If the examination fee is not fully paid, the application will not be accepted.
- (3) Accepted application documents will not be returned for any reason.
- (4) Even after admission has been granted, if any discrepancy is found with the information in the submitted documents, the admission may be cancelled.
- (5) For inquiries related to the application and other matters, contact the following section:
 Examination Section of Admissions Office, Educational Affairs Division of Sugitani Area Administration Department, University of Toyama,
 2630 Sugitani, Toyama City, Toyama Prefecture, 930-0194, Japan
 Phone: 076-434-7658

8. Security Export Control

The University of Toyama has established the "University of Toyama Security Export Control Regulations" based on the "Foreign Exchange and Foreign Trade Act", and conducts strict screening for security export control in the perspective of providing technology and export of research equipment and materials. If applicants who fall under any of the regulated items, you may not be able to get the permission to enroll, and receive the desired education at the university. There may be restrictions on your desired research activities.

[Reference] "University of Toyama Regulations Concerning Security Export Control"

9. Preliminary Consultation for Applicants with Disabilities

Applicants with disabilities (visual impairment, hearing impairment, physical disability, sickness, injury, developmental disability, etc.) who may require special arrangements in their admission examinations or in class should contact the Educational Affairs Division of Sugitani Area Administration Department prior to application.

If necessary, the University may hold interviews with the applicant or his/her previous school's staff members, who may represent him/her.

* Even if you apply for prior consultation, you are not obliged to apply to the University of Toyama.

(1) Consultation deadline

Category	Deadline
Enrollment in October 2023	16:00 on Thursday, June 22, 2023
Enrollment in April 2024 (The first recruitment)	
Enrollment in April 2024 (The second recruitment)	16:00 on Friday, December 1, 2023

(2) Consultation method

Please download a Preliminary Consultation application form from the University's website or create an application form containing the following information and submit it together with a doctor's medical certificate (its copy is also acceptable) to the Examination Section of Admissions Office, Educational Affairs Division of Sugitani Area Administration Department.

- [1] Name, gender, date of birth, address, telephone number and e-mail address
- [2] Program of choice and category of admission examination
- [3] Type and degree of disability
- [4] What special considerations the applicant desires during the admission examination
- [5] What special considerations the applicant desires during study
- [6] Measures taken at the previous university, etc. (Comments of the applicant's academic advisor)
- [7] Situation of daily life
- [8] Other matters for reference (Please also submit any reference materials to be used for consultation, e.g. a copy of Physical Disability Certificate, etc.)

(Reference) Preliminary Consultation Application Form page

(University's Home Page) → "Admission exam information" → "Preliminary consultation for applicants with disabilities"

(3) Contact for consultation

Educational Affairs Division of Sugitani Area Administration Department, University of Toyama, 2630 Sugitani, Toyama City, Toyama Prefecture, 930-0194, Japan
 Phone: 076-434-7658
 FAX: 076-434-4545

(Note) If you wish to use hearing aids, crutches, wheelchairs, etc., used in your daily life, during the examination, arrangements may be required in the examination venue settings, etc., so please contact us beforehand.

Preliminary consultation is intended to inform applicants with disabilities about the current situation of the University in advance and to find a better or ideal way when they take an admission examination and/or lessons; it is not intended to restrict their admission and study.

(Reference) Please refer to the Guidelines for staff to eliminate discrimination on the basis of disability at Toyama University (Home page) → "About the University of Toyama" → "Information".

10. Implementation for examination with Measures Against the Novel Coronavirus Infection

In the event of an unexpected situation, such as the spread of novel coronavirus infection, the contents of the student application guidelines, including the examination schedule, may be changed. If it is necessary to make such changes, we will inform you on our website, and please be sure to check the latest information.

<https://www.u-toyama.ac.jp>

VI Graduate School of Medicine and Pharmaceutical Sciences

The Graduate School of Medicine and Pharmaceutical Sciences is characterized by integrated education and research in medicine, pharmacy and nursing, allowing students to learn high-level practical expertise with a wide range of knowledge, as well as creativity skills based on the spirit of respect for human beings, so as to develop people who can actively contribute to the advancement of academic research and society as advanced medical professionals or educational researchers equipped with good comprehensive judgment.

Based on this objective, a degree will be granted to persons who have made academic achievements confirmed by this graduate school through acquisition of not only universal knowledge and skills in medicine, pharmacy, and nursing based on the fundamental abilities in a wide range of fields of education and research, but also the ability to think and act on their own to create something new based on the advanced specialized knowledge and ethics.

Please note that all graduate schools that will be reorganized in the 2022 academic year will adopt a four-term (quarter) system, and each course will be offered in principle on a single-term basis. Each term lasts for 8 weeks.

Comparison of two-term (semester) and four-term (quarter) systems

	Name of each term			
Two-term (semester) system	First semester		Second semester	
Four-term (quarter) system	First term	Second term	Third term	Fourth term

Overview of each program

1. Medical Sciences

(1) Purpose and Degree

The Medical Science program is designed to develop people who can improve their skills to go on to the graduate school's doctoral course or become professional medical specialists or specialist business workers through their experiences of acquiring specialty knowledge in medical science, practicing medical science research, presenting research results, and writing research papers.

A master's degree (medical science) will be awarded to persons who have completed this program.

(2) Special Measures for Educational Methods

In order to allow persons currently in employment to study without leaving their jobs, special measures can be taken in accordance with the "Special Provision on Educational Method Stipulated in Article 14 of the Standards for Establishment of Graduate Schools."

Persons eligible for the special educational measures can attend classes and research guidance not only in the daytime, but also at night if they submit a course plan in consultation with their academic advisors. As a rule, the night classes are scheduled between 18:10 and 21:20 from Monday through Friday. Apart from this schedule, eligible students can take the classes on Saturdays or during summer holidays depending on the class subject.

Class hours are scheduled as follows.

1st Period 8:45 to 10:15	2nd Period 10:30 to 12:00	3rd Period 13:00 to 14:30
4th Period 14:45 to 16:15	5th Period 16:30 to 18:00	
6th Period 18:10 to 19:40	7th Period 19:50 to 21:20	

(3) Requirements for Completion of Courses

As a rule, students must be enrolled for at least 2 years, take the designated classes (including special researches) to obtain 30 or more credits, receive the necessary research supervision, and pass the dissertation and final examination.

However, with regard to the period of enrollment, if a person has achieved excellent research results, a master's degree will be awarded to the person on condition that he/she is enrolled in the Master's Course of Graduate School for at least one year.

In addition, if a student, due to circumstances such as having an occupation, etc., puts forward a plan to take and complete a course in a planned manner for a certain period beyond the standard length of study (2 years), the plan may be approved.

(4) List of Research projects Conducted by Academic Advisors

See the attached Table I-1.

2. Nursing Sciences

(1) Purpose and Degree

In order to respond to the diverse needs of modern society, the purpose of this program is to develop highly specialized medical professionals or educational researchers who can play an active role in the fields of health, medical care and welfare by comprehensively utilizing the results of research and interdisciplinary knowledge in the specialized field of nursing.

This program includes Researcher course, Certified Nurse Specialist (CNS) (Maternal-Child Nursing CNS and Cancer Nursing CNS) course, and Nurse Practitioner (NP) course. Of these, the Certified Nurse Specialist (CNS) and Nurse Practitioner (NP) courses require nursing experience. Also, the Nurse Practitioner (NP) course is designed for a small number of excellent students, so we will take about 2 persons per year.

A master's degree (nursing sciences) will be awarded to persons who have completed this program.

(2) Special Measures for Educational Methods

In order to allow persons currently in employment to study without leaving their jobs, special measures can be taken in accordance with the "Special Provision on Educational Method Stipulated in Article 14 of the Standards for Establishment of Graduate Schools."

Persons eligible for the special educational measures can attend classes and research guidance not only in the daytime, but also at night if they submit a course plan in consultation with their academic advisors. As a rule, the night classes are scheduled to be taken from 18:10 to 21:20 from Monday through Friday. Apart from this schedule, you can take the classes on Saturdays or summer holidays depending on the class subject.

Class hours are scheduled as follows.

1st Period 8:45 to 10:15	2nd Period 10:30 to 12:00	3rd Period 13:00 to 14:30
4th Period 14:45 to 16:15	5th Period 16:30 to 18:00	
6th Period 18:10 to 19:40	7th Period 19:50 to 21:20	

Also, please note that practical training in the Certified Nurse Specialist (CNS) and Nurse Practitioner (NP) courses will be conducted during the daytime on weekdays.

(3) Requirements for Completion of Courses

As a general rule, students must be enrolled for at least 2 years and acquire the following credit: at least 30 for the Researcher course (or 32 if Maternal-Child Nursing is chosen), at least 54 for the Certified Nurse Specialist (CNS) course (Maternal-Child Nursing CNS, and Cancer Nursing CNS), and at least 71 (Acute care) or 66 (Chronic care) for Nurse Practitioner (NP) course. In addition, they are required to pass the dissertation and final examination after receiving the necessary research supervision.

However, with regard to the period of enrollment, if a student has achieved excellent research results, a master's degree will be awarded to the student on condition that he/she is enrolled in this course of the Graduate School of Sustainability Studies for at least 1 year.

In addition, if a student, due to circumstances such as having an occupation, etc., puts forward a plan to take and complete a course in a planned manner for a longer period up to 4 years beyond the standard length of study (2 years), the plan may be approved.

(4) List of Research projects Conducted by Academic Advisors

See the attached Table I-2.

3 Pharmaceutical Sciences

(1) Purpose and Degree

The Pharmaceutical Sciences program is designed to provide students with a wide range of knowledge and deep expertise, abundant medical creativity, and good comprehensive judgment with respect for human beings, so that it nurtures people who can contribute to the progress of people's health and academic research as researchers, educators, engineers, and specialists who are responsible for the development and dissemination of pharmaceuticals.

A master's degree (pharmaceutical sciences) will be awarded to persons who have completed this program.

(2) Requirements for Completion of Courses

As a rule, students must be enrolled for at least 2 years, take the designated classes (including special researches) to obtain 30 or more credits, receive the necessary research supervision, and pass the dissertation and final examination.

However, with regard to the period of enrollment, if a person has achieved excellent research results, a master's degree will be awarded to the person on condition that he/she is enrolled in the Master's Course of Graduate School for at least one year.

In addition, if a student, due to circumstances such as having an occupation, etc., puts forward a plan to take and complete a course in a planned manner for a certain period beyond the standard length of study (2 years), the plan may be approved.

(3) List of Research projects Conducted by Academic Advisors

See the attached Table I-3.

Table I-1 List of Research projects Conducted by Academic Advisors (Medical Sciences)

Educational area Responsible teacher Contact address	Research contents
Anatomy Professor ICHIJO Hiroyuki ichijo@med	Using the advantages and specificities of in vivo and in silico studies, we study the neural basis of experience-dependent modification of neural circuits that regulate emotion and behavioral change, and evolution of the neural mechanisms of innate attack and defense behaviors.
Physiology Associate Professor NISHIMARU Hiroshi nishimar@med	The amount of information processed in our brain in our daily life is estimated to be about 10 billion bits per second. These processes are carried out by the neural networks in the brain which are thought to be a real-time massive parallel processing system. Unraveling the mechanisms and principles of these networks is crucial for understanding how our brain works and also provides us a hint to live through the modern highly information-oriented society. To this end, we utilize neurophysiological and neuropsychological experimental approaches to elucidate higher brain functions including cognition of sensory information (input system), and behavioral manifestation based on sensory perception, memory, decision-making and motor control (output system).
Physiology Professor TAMURA Ryo rtamura@med	This century will be the era of brain sciences. "The mind" has long been regarded as one of the most enigmatic psychological processes. Recent technological advances have enabled us to approach the neural basis of the mind. The purpose of our research is to elucidate brain mechanisms of "learning and memory", one of the key members of the mind. For this, we mainly use laboratory animals such as monkeys and rats, record neural activities in the brain of the animals while they perform a behavioral (learning and memory) task or they are asleep subsequent to the task performance, and analyze the pattern of brain activities.
Brain Science Professor INOKUCHI Kaoru inokuchi@med	Recently it has been clarified that neurons in the brain are active even when animals sleep or rest, denoted as "idling brain state". Idling activity of the brain appears to play important roles in information processing than previously thought. In our laboratory, we aim to clarify the role played by idling brain by making full use of molecular biology, biochemistry, cell biology, histochemistry, electrophysiology, behavioral pharmacology, optogenetics, and live-imaging.
Systems Function and Morphology Professor ITO Tetsufumi itot@med	We do not sense the world as it is, but do collect the information which is important for our survival and recognize the sensory objects which are further selected by both unconscious and conscious processes. For the selection, which is essential for survival, animals possess sensory organs and neuronal circuitry which are optimized for their circumstances. Our laboratory mainly focuses on the hearing system, and study the mechanisms which allow to detect and sense the meaningful information for survival from environmental sounds. Using various techniques, we would like to investigate functional and morphological basis of the brain which allows the coding of sensory information, especially sounds, and the sensory perception.
Pathology Professor HIRABAYASHI Kenichi hiraken@med	Pathology is a field that deals with the pathophysiology and diagnosis of diseases. Pathology targets a wide range of diseases throughout the body, including not only malignant tumors but also inflammatory diseases. Until now, pathology has focused on the evaluation of macro- and microscopic morphology, but pathology is undergoing major changes with the introduction of molecular diagnostics and comprehensive genetic analysis. In our department, we are conducting clinical and basic research, including molecular methods, to elucidate the functions of diseases and to establish new disease concepts. In particular, we are conducting research on biliary tract and pancreatic diseases.

Educational area Responsible teacher Contact address	Research contents
Pathology Associate Professor YAMAMOTO Seiji seiyama@med	<ul style="list-style-type: none"> • We promote a research to elucidate the function of platelet-derived growth factor receptor (PDGFR) in mice, especially neural tissue, neural stem cells, and blood vessels. • We also conduct in vitro studies using cells isolated from such mice to elucidate that the PDGFR signal is involved in the regeneration and functional recovery of several organs and tissues. • We create novel genetically engineered animals, such as knockout mice, to study intractable human diseases, to explore and identify factors involved in disease progression, and promote research to develop novel treatment methods for patients.
Microbiology Professor MORINAGA Yoshitomo morinaga@med	<p>The commensal microbiota on our body surface can affect our health and diseases. However, some microorganisms, which we call pathogens, also induce infectious diseases. We focus on the interaction between the microbiota and pathogenic microorganisms using culture- and molecular-based techniques and try to understand their roles on our health and diseases.</p>
Molecular and Medical Pharmacology Professor NAKAGAWA Takashi nakagawa@med	<p>Recently, a number of aging- and longevity-related molecules have been identified. Interestingly, most of them are linked with metabolism, and it has been reported that many of energy-sensing pathways are deeply involved in aging process. NAD (Nicotinamide adenine dinucleotide) is an important co-factor, and regulates various cellular processes, including energy metabolism, stress responses, and DNA damage repair. Decline of NAD metabolism causes physiological aging and aging-related diseases, such as cancer, neurodegenerative disease and metabolic disease. Aim of our laboratory is elucidating the molecular mechanism how NAD metabolism and its downstream targets regulate aging process. We also try to develop anti-aging therapeutics. Our lab takes the advantage of state-of-the-art techniques including metabolomics based on LC/MS and GC/MS, and mouse models in which various NAD synthesis and consuming enzymes are genetically engineered. We also elucidate the pharmacological action of KAMPO medicine using metabolomics.</p>
Epidemiology and Health Policy Professor SEKINE Michikazu sekine@med	<p>Our mission is to conduct epidemiological studies and apply the results for health policy. To achieve this mission, we conduct several epidemiological studies. The Japanese civil servants study (the JACS study) comprises approximately 5,000 Japanese civil servants and aims to clarify whether socioeconomic factors, psychosocial stress at work, and work-life balance is associated with the development of poor physical and mental health. The JACS study is an international collaborative study with the British civil servants study (the Whitehall II study) and the Finnish civil servants study (the Helsinki Health Study). The Toyama birth cohort study (the Toyama study) is a birth cohort study of approximately 10,000 Japanese children. The MEXT Super Shokuiku School project comprises approximately 2000 children and their parents. Both studies accumulate epidemiological evidence on health promotion from childhood. The Toyama Dementia Survey is an ageing and gerontological study of approximately 1000 adults aged 65 or more.</p> <p>Postgraduate students become members of the research units and are involved in each step of epidemiological research (i.e. study planning, and conducting, data analysis, and manuscript writing and publishing). The following is examples of current research topics.</p> <ul style="list-style-type: none"> • International comparative studies on the associations of psychosocial stress at work, work-life balances, health behaviors and personality characteristics with health • International comparative studies on socioeconomic inequalities in physical and mental health • Epidemiological study on the prevention of noncommunicable diseases from childhood • Epidemiological study on the prevention of dementia

Educational area Responsible teacher Contact address	Research contents
Public Health and Environmental Medicine Professor INADERA Hidekuni inadera@med	Focus of children's environmental health is the discovery and prevention of diseases in children that are associated with harmful exposures from the environment. Our department is one of the regional centers of the Japan Environment and Children's Study, a nationwide birth cohort study in Japan. We also conducted toxicological research of environmental chemicals. The goal of occupational health is the promotion of the highest degree of physical, mental and social well-being of all workers.
Legal Medicine Professor NISHIDA Naoki nishida@med	We mainly interested in cardiovascular and neuropathology, and aim to establish the new aspect of the field. The area of studies are not localized in morphology, but the method of molecular biology is used. We try to perform investigation to contribute the progress of clinical medicine such as diagnosis and treatment, in addition to progress of forensic medicine.
Molecular Neuroscience Professor MORI Hisashi hmori@med	We focus on molecular basis of brain function and dysfunction. To develop the novel methods for diagnosis and cure of neurodegenerative and neurodevelopmental disorders, we have used molecular biological approaches to generate new mouse models of such disorders and new probes to detect functional change in the brain.
Health Professional Education Professor TAKAMURA Akiteru akiteru@med	Students will learn basic theories of pedagogy, andragogy and medical education based on cognitive psychology and behavioral science, etc., and research educational curriculum development, learner evaluation and assessment, teaching methods, etc. using these theories. In addition, we will conduct systems research in the area of primary care, including general practice, community-based comprehensive care, and multidisciplinary collaboration.
Clinical and Cognitive Neuroscience Professor HAKAMATA Yuko hakamata@med	We aim at understanding the neurobiological mechanisms underlying emotional dysregulation associated with distorted cognitions, and using this understanding to develop novel, effective psychological interventions for anxiety and depressive disorders. We address these questions from the integrative view including psychology, cognitive behavioral science, endocrinology, immunology, genetics, and neuroscience.
Gene Expression and Regulation Associate Professor KAIDA Daisuke kaida@med	Gene expression mechanism is indispensable for all organisms and defects in the mechanism cause many types of diseases. We are interested in gene expression mechanisms, especially pre-mRNA splicing and protein degradation. We are also interested in development of anti-cancer drug based on splicing inhibitors and development of drugs to cure aging related diseases which activate degradation of deleterious proteins accumulated in cells because of aging.
Diabetes and metabolism, rheumatic and respiratory diseases Professor TOBE Kazuyuki (will be retired in March 2024) tobe@med	<ul style="list-style-type: none"> • Dissection of the pathogenesis of type 2 diabetes and metabolic syndrome. • Development of the methods to treat and prevent type 2 diabetes and metabolic syndrome.. • Elucidation of the mechanisms how adipose tissue macrophages and microbiota induce insulin resistance in type2 diabetes. • Clinical studies on the treatment of lung cancers by immune checkpoint inhibitors. • Clinical usefulness of joint echo to detect rheumatoid arthritis at an early stage. • Dissection of genetic factors of type 2 diabetes, rheumatoid arthritis and asthma. <p>Development of tailor-made therapy.</p>

Educational area Responsible teacher Contact address	Research contents
Internal Medicine Professor KINUGAWA Koichiro kinugawa@med	Cardiovascular diseases have been increasingly popular in Japan along with aging society. Ischemic heart disease due to atherosclerosis with uncontrolled multiple risk factors, valvular disease in aged population, heart failure as a terminal figure of all heart disorders, and a number of arrhythmias modifying their clinical course are common. It is crucial to find out the underlying mechanisms of them, and to explore the therapeutic and preventive strategies for them. Also, renal diseases are closely related with cardiovascular diseases, and the relationship has been called as cardio-renal syndrome. Not only primary kidney disease such as nephritis, but also secondary renal dysfunction caused by heart failure should be an important target for investigation.
Internal Medicine Professor YASUDA Ichiro yasudaic@med	Gastrointestinal diseases are very popular and various. The second to fifth causes of cancer death in Japan are currently gastrointestinal cancers. Besides malignant tumors, they include benign tumors, inflammatory, infectious, and functional disorders. We elucidate the pathogenesis of such diseases and conduct basic and clinical studies on the diagnosis and therapy.
Internal Medicine Professor SATO Tsutomu tsutomus@med	With the advancement of an aging society, patients who have hematological malignancies have been steadily increasing. Since hematological malignancies are highly sensitive to chemotherapy, progress of chemotherapy has been accompanied by that of hematology. Hematopoietic stem cell transplantation was an answer reached by an extreme line of thought that the more chemotherapeutic agent was administered, the more cancer cells were killed. However, there were limits to that therapy, that is, severe side effects and multidrug resistance in tumor cells. Molecularly-targeted therapy and preventing side effects of chemotherapy is modern trends today. To meet such social needs, bench-to-bed research has been conducted in our department.
Clinical Infectious Diseases Professor YAMAMOTO Yoshihiro yamamoto@med	〔Research content〕 Study of infectious diseases 〔Guidance content〕 <ul style="list-style-type: none"> • Pharmacokinetics-pharmacodynamics analysis of antimicrobial agents • Appropriate antibiotic treatment with molecular microbiology • Establishing surveillance system of nosocomial infection • Analysis of prognostic factors of Legionella Infection
Dermatology Professor SHIMIZU Tadamichi shimizut@med	Environmental and intrinsic factors cause exacerbation of skin diseases. For example, percutaneous entry of environmental allergens through barrier-disrupted skin is strongly associated with the induction of immunological responses. Exposure to ultraviolet radiation leads to various acute deleterious cutaneous effects including sunburn and immunosuppression, and the long-term consequences lead to premature aging, including photo carcinogenesis. The purpose of our department is to investigate the mechanisms of cutaneous diseases caused by environmental and intrinsic factors.
Neuropsychiatry Professor SUZUKI Michio (will be retired in March 2024) suzukim@med	Recent advances in brain imaging techniques have enabled us to explore brain structure and function non-invasively in vivo. However pathophysiology and mechanisms of mental disorders are still remain elusive. In our department, clinical and basic researches are being performed to elucidate pathophysiology of severe mental illnesses such as schizophrenia and to develop innovative and optimized approaches for diagnosing and treating patients for the purpose of improving their long-term outcome.
Diagnostic and Therapeutic Radiology Professor NOGUCHI Kyo kyo@med	By the rapid development of the medical imaging, not only high-resolution anatomical image but also functional image can be obtained. Using the functional images, we are able to evaluate the function and metabolism of the living body. We aim at developing the new imaging method of early diagnosis with combination of the high-resolution anatomical image and functional image

Educational area Responsible teacher Contact address	Research contents
Radiation Oncology Professor SAITOH Jun-ichi junsaito@med	Biological effects of physical and chemical stresses (radiation, ultrasound, hyperthermia, plasma and chemicals) and their application for therapeutics.
Surgery Professor YOSHIMURA Naoki ynaoki@med	We reach an aging society, and coronary disease, aneurysms, peripheral arterial disease, malignant neoplasms increase, and the less invasive surgical technique should be developed.
Surgery Specially Appointed Professor TSUCHIYA Tomoshi tsuchiya@med	Collaboration with the Department of Biosystems and Biomedical Engineering, Faculty of Engineering, aims to regenerate lung organs. An organ regeneration method to recellularize rat decellularized tissue skeleton will be used to create disease models. Research areas will encompass stem cells, cell adhesion, mechanical stress, and cancer research. (Ref : https://www.organengineering.com/)
Surgery Professor FUJII Tsutomu fjt@med	The aim of our research is to solve the clinical questions and feed them back to the clinical practice. Research for the science and technology about esophagus-gastro-enterological surgery, liver-biliary-pancreatic surgery, pediatric surgery and breast and thyroid disease surgery.
Neurosurgery Professor KURODA Satoshi skuroda@med	〔Research content〕 Neurosurgical aspects of basic and clinical research are included in this course. 〔Guidance content〕 (1) Stem cell research (2) Molecular and stem cell research of malignant glioma (3) Angiogenesis of cerebrovascular disorders (4) Cognitive function in neurosurgical disorders (5) Electrophysiological analysis (6) Epidemiological analysis of stroke
Orthopaedics and Locomotor System Science Professor KAWAGUCHI Yoshiharu zenji@med	<ul style="list-style-type: none"> • Developmental biology of skeletal tissues • Pathomechanism of joint destruction • Development of therapeutic strategy for arthritic diseases • Genetic analysis of spinal disorders • Biomarkers of spinal disorders • Clinical outcomes of spinal surgeries • Differentiation induction for malignant soft tissue tumors
Obstetrics and Gynecology Professor NAKASHIMA Akitoshi akinaka@med	<p>Pregnancy is well balanced with sexual hormones, cytokines, chemokines, or angiogenic factors. As fetuses and mothers talk to each other during pregnancy, the disruption of this talk leads to some diseases in pregnancy, such as preterm labor, preeclampsia, or recurrent pregnancy loss. So far, we have focused on and investigated the relationship between fetuses and mothers from the viewpoints of immunology and molecular biology, especially autophagy, a mechanism for maintaining cellular homeostasis. Recently, we also tackle to develop new diagnostic technics for preterm labor, preeclampsia, or recurrent pregnancy loss, so called "bench-to-bedside".</p> <p>For the gynecologic cancers, we tried to expect the prognosis by an immunological change in peripheral blood from women with MSI-high endometrial cancers. The technics might be available for other types of cancers. In addition, we investigate the role of autophagy for cervical cancers between with and without the HPV infection.</p>

Educational area Responsible teacher Contact address	Research contents
Ophthalmology Professor HAYASHI Atsushi ahayashi@med	Ophthalmology is an area to research the eye which plays important roles in quality of life. The eye is a peculiar organ and needs specific approaches for its research. Our department focuses on quantitative analysis of eye movement using eye-tracker in strabismus patients, evaluation of treatment effects on orbital diseases using MRI images, neuroprotection research using ischemia-reperfusion model in animals. Our department is also researching new applications of hyper dry amniotic membrane for eye diseases. We aim translational researches.
Urology Professor KITAMURA Hiroshi hkitamur@med	Our medical staffs in the department have dedicated themselves to better care for patients having urological diseases. We are conducting basic and translational research for providing various strategies for treatment of the diseases that patients are satisfied with. We are enthusiastic about studying basic science of urology that will lead to a future innovative treatment.
Comprehensive Oral Sciences Professor NOGUCHI Makoto (will be retired in March 2024) mnoguchi@med	Oral and maxillofacial region is composed of several important organs for articulation, mastication and deglutition, which are essential for human life. Several disturbances of these functions may lead to decreasing quality of life. Early detection and early treatment of oral disease could contribute to keep up the social activity as well as to improve patient's prognosis. Our research programs address for better understanding pathogenesis of oral disease and developing of novel treatment modalities based on the basic research. Further, studies on rehabilitation of oral function and the functional reconstruction are being pushed along.
Clinical laboratory medicine Associate Professor NIIMI Hideki hiniimi@med	In this master's course, we plan to have students engage in new research and development that advances and develops existing clinical examination methods. In order to advance and develop existing clinical testing methods, specifically, it is necessary to improve at least one of the rapidity, convenience, sensitivity, and specificity of testing, and as a result, contribute to clinical practice. Furthermore, if we can measure new biomarkers that have never existed before, there is even the possibility of creating new medical treatments. As mentioned above, I would like students to boldly take up the challenge of research and development with free thinking and a scientific approach.
Japanese Oriental Medicine (Kampo Medicine) Professor KAINUMA Mosaburo kainuma@med	Due to the growing interest in Kampo medical practices in recent years, the number of doctors who prescribe Kampo medicine is increasing. Many prescriptions are evidence based, but it is difficult to know what should be done if the prescribed medicine is ineffective? Unfortunately, the number of Kampo medicines supported by evidence-based studies is limited, and something must be done to remedy this situation. The purpose of Basic Japanese Oriental (Kampo) Medicine is to understand the history and pathological concepts of Kampo, then to educate medical professionals in how best to use this knowledge in the diagnosis and treatment of our patients.
Neurology Professor NAKATSUJI Yuji nakatsuj@med	The pathomechanisms of many neurological diseases are not well-known and there are few effective treatments against those disorders due to the lack of appropriate methods to elucidate. However, recent development of image analysis and analyzing biological samples, and neuroimmunological insight enable new approaches to elucidate. We need to learn latest knowledges and way of thinking to establish novel approaches to understand the disorders.
Emergency Medicine Professor DOI Tomoaki doit@med	Research Interests The concept of "saving lives" in emergency medicine is the starting point of medicine. Therefore, emergency medicine is an area that all medical professionals should learn. Emergency medicine is a fight against rapidly evolving invasions, and the challenge is how to provide damage control treatment or definitive treatment within the time constraints and limited amount of information to save lives. The analysis of pathophysiology and establishment of treatment methods for invasions are the research targets of emergency medicine.

Educational area Responsible teacher Contact address	Research contents
	Contents of Instruction 1) Standardization of cardiopulmonary resuscitation and development of educational methods. 2) Standardization of primary trauma care and development of educational methods for medical professionals. 3) Standardization of disaster medicine and development of educational methods.
Clinical Oncology Professor HAYASHI Ryuji hsayaka@med	<ul style="list-style-type: none"> • Clinical practice of cancer genome medicine. • The effect of immune check point inhibitor and micro biome. • Epidemiology of the elderly cancer patients. • The different recognition between ordinary person and medical staff. • Research of immuno-oncology with cancer model mice. • Cancer metabolism. • Cancer cell biology and target therapy.
Patient Safety Professor NAGASHIMA Hisashi hisashin@med	Patient safety plays an important role in modern health care system but not well systematized. We are conducting basic and clinical research regarding systematic approach for creating and managing patient safety system and focused on changing healthcare environment affected by the current progress in health care sciences, divergence of public values, change of age composition and introduction of "Community-based integrated care systems".
Plastic, Reconstructive and Aesthetic Surgery Professor SATAKE Toshihiko toshi@med	Plastic, Reconstructive and Aesthetic Surgery aims to improve the patients' post-operative quality of life by correcting/enhancing the morphology, function, and color of their body surface with surgery, lasers, and other procedures. Our focus is on congenital anomalies of the face, extremities and trunk, trauma care and reconstructive surgery after cancer removal with better functional and cosmetic outcomes, anti-aging treatment, and cosmetic surgery. Our research mission is to look ahead 10-20 years, advance knowledge and create new treatment which is minimally invasive, with excellent functional and aesthetic outcomes and patient satisfaction.
Artificial Intelligence and Data Science Research Professor TAKAOKA Yutaka ytaoka@med	In our divisions, we address acupuncture research which is based on molecular cell biology and bioinformatics, molecular simulation-based mathematical modeling of medicine and social medicine research as follows: <ul style="list-style-type: none"> • Prediction of adverse drug reactions base on molecular simulation and mathematical models • Prediction of drug efficacy of molecularly target drugs for cancer based on molecular simulation and mathematical models • Design of nucleic acid drugs and evaluation of drug efficacy • Application of drug repurposing to computational drug design • Molecular simulation analysis of pathological conditions caused by amino acid substitutions • Application of AI technologies such as machine learning and natural language processing to improvement of hospital functions • Research on diagnostic support of medical images by neural network analysis • Research for medical treatment systems and elderly care service systems • Research for Elderly Health Care as a Public Service of community healthcare • Molecular mechanisms of therapeutic effects of acupuncture

Educational area Responsible teacher Contact address	Research contents
Rehabilitation Medicine Professor HATTORI Noriaki hattorin@med	<p>Based on the conventional concept of rehabilitation, namely, recovering physical and mental functions deteriorated due to diseases or injuries to overcome disabilities, recent rehabilitation medicine focuses on the individual "activity", and is aiming for having patients obtain better ADL (activities of daily living) and QOL (quality of life). The target diseases and injuries are not limited to the neurological and orthopedic diseases, but also include cardiovascular, respiratory, and other visceral diseases, cancer, sarcopenia, and frailty.</p> <p>The subjects of our research are the development of objective indicators for rehabilitation medicine using the latest technology and analysis methods for these disorders, as well as the creation of new rehabilitation intervention methods to promote functional recovery and to improve patients' ADL and QOL.</p>
Innovative Clinical Research Professor CHUJO Daisuke dchujo@med	<p>We are working on the development and support for innovative clinical research to investigate the pathology of various diseases and to develop novel therapies. We are not only conducting clinical research, but also investigating how to improve systems for conducting clinical research, such as supporting systems for writing protocols, medical statistics, data management, and clinical research coordination, leading to the development of clinical research experts. In addition, we are conducting observational studies using the data from electronic health records, registry studies for various diseases, and interventional studies to develop innovative medicine. We are also working on the development of human resource handling medical data.</p>
Behavioral Physiology Professor TAKAO Keizo takao@cts	<p>"Mind" is one of many brain functions. The brain receives and processes various types information necessary for the emergence of mind. An individual's behavior is the final output of brain function. Even with today's technology, it is difficult to directly study "mind", but analyses of brain and behavior contribute to elucidate the principles of "mind". Our laboratory aims to resolve the cellular and molecular mechanisms of "mind", including memory, learning, and emotion, using behavioral genetics, optogenetics, and pharmacologic and physiologic techniques. With these techniques, we also aim to resolve the pathophysiology of neuropsychiatric disorders and to develop treatments for these diseases. In addition, we are working to develop mouse models of nervous system diseases, and new reproductive technologies.</p>

Human Science Professor KANAMORI Masahiko kanamori@med	<ol style="list-style-type: none"> 1 Basic research on human science and disease studies 2 Clinical research on medical practice 3 Research on hospital infection 4 Research on anti-microbial effects of natural ingredients
Behavioral Science Professor HORI Etsuro hori@med	<ol style="list-style-type: none"> 1 Basic behavioral science research on emotion and communication 2 Physio-behavioral research on nursing art and science

Table I-3 List of Research projects Conducted by Academic Advisors (Pharmaceutical Sciences)

Educational area Responsible teacher Contact address	Research contents
Biopharmaceutics Professor HOSOYA Ken-ichi hosoyak@pha	<ul style="list-style-type: none"> • Blood-retinal barrier transport function analysis and drug delivery to the retina • Blood-retinal barrier cell reconstruction and analysis of interaction between cells • Elucidation of biological function and transport function in in vivo barrier tissue
Applied Pharmacology Professor KUME Toshiaki tkume@pha	<ul style="list-style-type: none"> • Elucidation of pathogenesis mechanisms of neurodegenerative diseases, pruritus, pain and dysesthesia and search and development of preventive and therapeutic drugs for these disorders • Establishment of novel animal models that exhibit the brain diseases and the sensory symptoms, such as itch, pain and dysesthesia • Search for cytoprotective substances derived from foods and plants
Biorecognition Chemistry Professor TOMOHIRO Takenori ttomo@pha	<ul style="list-style-type: none"> • Chemical biology for efficient drug discovery: target identification, visualization, utilization, and manipulation • Drug activity-based functional proteomics • Synthetic multicomponent integration strategy toward chemical biology and drug discovery
Cancer Cell Biology Professor SAKURAI Hiroaki hsakurai@pha	<ul style="list-style-type: none"> • Elucidation of the molecular mechanisms of tumor progression via inflammatory signaling pathways • Study on the activation mechanisms of molecular targets in cancer therapy • Study on the intracellular signals in malignant progression of melanoma
Chemical Biology Associate Professor CHIBA Junya chiba@pha	<ul style="list-style-type: none"> • Chemical biology based on synthetic chemistry, particularly three projects in artificial DNA, protein control, and saccharide recognition
Synthetic and Medicinal Chemistry Professor MATSUYA Yuji matsuya@pha	<ul style="list-style-type: none"> • Development of new organic reactions for drug discovery • Search for novel seeds of new drugs and structure-activity relationship research • Synthesis and structural optimization of bioactive compounds
Molecular Neurobiology Associate Professor TABUCHI Akiko atabuchi@pha	<ul style="list-style-type: none"> • Elucidation of the molecular mechanisms underlying regulation of neuronal function and plasticity by gene expression and cellular communication between synapses and a nucleus • Studies on neurological disorders caused by dysfunction of transcription factors and synaptic molecules • Basic studies on transcription factors and synaptic molecules toward drug development targeted for neurological disorders
Gene Regulation Associate Professor HIROSE Yutaka yh620@pha	<ul style="list-style-type: none"> • Study on the molecular mechanism of transcription initiation by RNA polymerase II • Study on the role of mammalian Mediator complex in controlling gene expression • Study on the regulatory mechanism of pre-mRNA processing coordinated with transcription • Study on the pathogenic mechanisms of human diseases caused by misregulation of gene expression program
Molecular Cell Biology Professor SO Takanori tso@pha	<ul style="list-style-type: none"> • Elucidation of novel proinflammatory cytokine signaling mechanisms regulated by TRAF family molecules • Elucidation of regulatory mechanisms of TNFR family molecules in T cells • Elucidation of molecular pathology of X-linked adrenoleukodystrophy
Synthetic and Biomolecular Organic Chemistry Professor YAKURA Takayuki yakura@pha	<ul style="list-style-type: none"> • Development of environmentally benign organic reactions • Synthesis of biologically active natural products • Pharmaceutical chemical research in bioactive substances

Educational area Responsible teacher Contact address	Research contents
Biointerface Chemistry Professor NAKANO Minoru mnakano@pha	<ul style="list-style-type: none"> • Study of membrane lipid dynamics and elucidation of lipid transfer machinery • Elucidation of lipid flip-flop mechanisms • Biophysical research for interaction of amyloid beta with membranes • Structural and functional investigation and pharmaceutical application of lipid nanoparticles
Structural Biology Professor MIZUGUCHI Mineyuki mineyuki@pha	<ul style="list-style-type: none"> • Studies on the conformations of disease related proteins • Structural basis for intracellular membrane trafficking • Protein structure-based drug discovery
Pharmaceutical Physiology Professor SAKAI Hideki sakaih@pha	<p>Physiological, biochemical and pharmacological studies on normal and cancer cells to clarify</p> <ol style="list-style-type: none"> 1) interactions between drugs and ion transporting proteins such as pumps, transporters and channels 2) functional relations among ion transporting proteins 3) pathophysiological functions of ion transporting proteins
Medical Pharmaceutics Professor TO Hideto hidetoto@pha	<ul style="list-style-type: none"> • Translational research for clinical application of chronotherapy • Development of new drugs targeting factors regulating the circadian rhythm of morbid states • Application of chronotherapy for individualized medicine • Nasal formulation development and therapeutic application for CNS diseases by nose-to-brain drug delivery system
Clinical Pharmacology Professor SASAOKA Toshiyasu tsasaoka@pha	<ul style="list-style-type: none"> • Development of new insulin sensitizers based on the mechanisms of type 2 diabetes and insulin resistance • Elucidation of central mechanisms regulating energy and glucose homeostasis via inter-organ metabolic pathway • Development of a novel treatment of diabetic complications based on the pathogenic mechanisms
Clinical Pharmacokinetics Professor HASHIMOTO Yukiya (will be retired in March 2025) yukiya@pha	<ul style="list-style-type: none"> • Basic and clinical research on pharmacokinetics and drug efficacy/toxicity: especially, analysis of effects of disease states, concurrently-administered drugs, and genetic polymorphisms on the function of the drug-metabolizing enzyme and transporter; furthermore, development of individualized dosage regimens based on the influencing factors identified
Pharmaceutical Therapy and Neuropharmacology Professor NITTA Atsumi nitta@pha	<ul style="list-style-type: none"> • Behavioral pharmacological, molecular biological and cell biological studies to clarify the function of the novel molecules for clarification of mechanism of psychiatric diseases onset • Study for the clarification of the mechanisms of establishment of addiction of nicotine, THC and methamphetamine • Clinical studies for the clarification of causes of onset of mental diseases
Pharmacy Practice and Sciences Professor TAGUCHI Masato taguchi@pha	<ul style="list-style-type: none"> • Development of minimal clinical trial design and data analysis for personalized medicine • Optimization of dosing regimen based on considerations of interindividual variability in developmental change • Problem formulation and scientific implementation in practice to address therapeutically relevant issues

Educational area Responsible teacher Contact address	Research contents
Integrative Pharmacology Professor TSUNEKI Hiroshi htsuneki@pha	<ul style="list-style-type: none"> • Development of novel therapeutic strategy to treat type 2 diabetes and its complications based on the pathogenic mechanisms • Investigation of the mechanisms underlying the maintenance of glucose and lipid homeostasis by brain and inter-organ network • Investigation of the role of olfactory and other sensory systems in the regulation of glucose and lipid metabolism
Clinical Pharmaceutics Professor KATO Atsushi kato@med	<ul style="list-style-type: none"> • Drug seed discovery research and evaluation of drugs targeting diabetes, allergic disorders, and other illnesses centered on glycomimetic alkaloids and herbal medicine-derived compounds • Biochemical research concerning glucolipid metabolic disorders focused on the properties of glycoproteins, glycohydrolases, and glycosyltransferases
Pharmaceutical Technology Guest Professor ONUKI Yoshinori onuki@pha	<ul style="list-style-type: none"> • Development of optimization techniques for designing pharmaceutical formulations and manufacturing processes • Studies on pharmaceutical characteristics using time domain NMR
Pharmaceutical Technology Specially Appointed Associate Professor OKADA Kotaro kokada@pha	<ul style="list-style-type: none"> • Development of methods for evaluating the physical properties of pharmaceutical products using nuclear magnetic resonance relaxation
Molecular Genetics Professor TABUCHI Yoshiaki ytabu@cts	<ul style="list-style-type: none"> • Mechanical control of cell differentiation • Elucidation of molecular mechanism of cellular stress response • Reconstruction of tissue functions by immortalized cells
Pharmacognosy Professor SHOJI Tsubasa tsubasa@inm	<ol style="list-style-type: none"> 1. Molecular regulation of alkaloid and terpenoid pathways in medicinal plants of the Solanaceae family. 2. Novel regulatory mechanisms of alkaloid pathways in tobacco plants. 3. Biosynthesis and accumulation of natural sweeteners. 4. Collaborate with industry partners to apply our research to the stable supply and production of herbal medicines.
Natural Products & Drug Discovery Professor MORITA Hiroyuki hmorita@inm	<ul style="list-style-type: none"> • Studies on biosynthesis of naturally occurring bioactive compounds • Structural basis for secondary metabolite enzymes • Enzyme engineering for novel drug development • Isolation of bioactive compounds from plants, microorganisms, and marine organisms • Investigation of Asia's natural resources not fully utilized • Discovery of natural anticancer agents from medicinal plant resources by employing a novel antiausterity screening strategy • Chemical investigation of medicinal plants and search for novel bioactive secondary metabolites • Investigation of the structure-activity relationship of the active natural compounds and their mechanism of action against cancer cell survival pathways • Discovery of metabolomics biomarkers associated with cancer cells by utilizing FT-NMR and MS strategy

Educational area Responsible teacher Contact address	Research contents
Neuromedical Science Professor TOHDA Chihiro chihiro@inm	<ul style="list-style-type: none"> • Elucidation of the molecular mechanism of restoring the neuronal network, and crosstalk between the central nervous system and peripheral organs to activate neural function. • Traditional medicine research for developing fundamental therapeutic drugs for Alzheimer's disease, spinal cord injury, degenerative cervical myelopathy, glaucoma, and disuse syndrome. • Clinical study aiming to develop new botanical drugs and new usage of Kampo formulas. • Clinical study to analyze factors affecting physical and mental health and to identify biomarkers of wellbeing. • Consilienceology for Wakan-yaku 1) Diagnosis for functional mental diseases based on the Wakan-yaku response, and clarification of molecular mechanisms for the diseases 2) Development of novel Wakan-yaku prescriptions to prevent lethal recurrence of heart failure
Host Defences Professor HAYAKAWA Yoshihiro haya@inm	<ul style="list-style-type: none"> • Study of NK cell biology and its roles in immunity • Role of innate immune responses in cancer progression • Immunological study of inflammatory & allergic diseases • Modulation of immune responses and immunological diseases by Kampo medicines • Study to regulate cancer progression & metastasis • Elucidation of novel actions of kampo medicines and food factors on the basis of modulation of intraluminal bile acid metabolism in gastrointestinal tract
Complex Biosystem Research Professor NAKAGAWA Yoshimi ynaka@inm	<ul style="list-style-type: none"> • Functional analysis of transcription factors that regulate glucose and lipid metabolism • Study for nutrient metabolism regulation by cell-cell and tissue-tissue interaction • Study for the molecular mechanism of improvement of lifestyle-related diseases by Wakan-yaku • Study for the mechanism of lifestyle-related diseases caused by sleep disorders • Establishment of information science analysis using integrated omics analysis
Presymptomatic Disease Professor KOIZUMI Keiichi kkoizumi@inm	<ul style="list-style-type: none"> • Understanding of the fluctuation of biometric information and its medical applications. • Development of the glutaminase inhibitor and its medical applications. • Elucidation of the function of immunostimulatory nanoparticles and nucleotide degradant discovered by traditional Japanese medicine (Kampo formula) and their medical applications. • Elucidation of the pathological mechanism and the search for new seeds of medicine for medical applications in enteric immune diseases.
Kampo Diagnostics Professor SHIBAHARA Naotoshi shiba1@inm	<ul style="list-style-type: none"> • Pharmacological effects of Kampo medicines and their herbal components, as well as their mechanisms of action • Search for indicators of clinical pathology of Kampo medicine and "sho"

Date: Year Month Day

Pledge for the Security Export Control -At the time of admission/adoption-

To President , University of Toyama

Full name: _____

(Signature) _____

I hereby pledge to comply with the following items during my enrollment/employment upon my admission/adoption by University of Toyama.

1. In any of the following cases, for students, I shall consult my supervisor or advisor, for faculties or researchers, I shall consult security export control advisor. If necessary, I shall take the procedures prescribed by the Foreign Exchange and Foreign Trade Act as well as applicable acts or ordinances established by the government of Japan, and the internal regulations of the university. Additionally, if it is subject to any export control regulations set by foreign governments, I shall obey all corresponding regulations.
 - (1) In the case that I intend to provide research-related technical information or experimental data to a foreign country, a non-resident * (a foreigner who resides in Japan less than 6 months after entry, Japanese staying abroad, or branches of Japanese corporations in foreign countries, etc.), or a resident under the significant influence of a non-resident (a person falling under the Specific Categories *). Also, in the case that it becomes clear that I will provide research-related technical information or experimental data after leaving the university.
 - (2) In the case that I intend to export (sending or bringing out to foreign countries) equipment or materials used in research or tangible objects gained by research. Also, in the case that it becomes clear that I will export aforesaid items after leaving the university.
2. I shall not use the research-related technical information or experimental data for the development, production, use, or storage of weapons of mass destruction (WMD; nuclear weapons, chemical weapons, biological weapons, WMD delivery systems such as missiles, and unmanned aerial vehicles) and conventional weapons, or materials, components, or products used aforesaid weapons. I shall use such research-related technical information or experimental data only for civil purposes.
